IN-HOUSE GRAPHIC DESIGN

AUSTRALIA WIDE DELIVERY

**FMC chose Drum Print as their preferred supplier of quality print and design nationally**

... and here's some great reasons to make Drum your preferred supplier as well.

## The long story...

We were more than pleased when FMC recently asked us to assist in the print and design requirements for Eflex.

For us, launching Eflex involved creating Eflex Home Owner and Trade brochures, Excel and Warranty brochures, a complete suite of new "termite secure" logos, vehicle signage, spider boards, TV graphics, yellow pages, press and magazine ads, termite ID booklets, Training Manuals, Presentation Folders, Warranty and Training certificates and coffee cup design, all produced in-house, on time and on budget, and distributed Australia wide.

We must have done something right. Since then we have extended our working relationship with the redesign of both the HomeGuard Home Owners and Builders/Architect brochures.

Over the past twenty five years Drum Print has built a reputation for quality design and print, reliability and fair pricing.

To maintain this reputation we invest in the latest printing technology, both digital and offset (see our brand new A2 5 colour Sakarai and Bizhub high quality digital presses above).

We have extensive Professional Pest Management experience in print and design requirements.

We supply a number of major Pest Management companies with everything from meter box stickers to NCR contract and report books, press and magazine ads, direct mail letterbox drop literature and presentation folders.

If you need it yesterday or if you are fed up with waiting for your printer to call or get back to you we are the answer to your next printing project. We have the firepower, the commitment, modern presses and our experienced craftsmen and women are the right fit for your printing solutions.

The Drum team are ready to update your existing artwork incorporating Eflex or to give your company a whole new look.

We are proud of our association with FMC.

Our companies think alike and strive to find the most economical, environmentally responsible and sustainable solution to the our client's problems.

## The short story...

**Extensive Pest Management print experience.**
